

# It's easier to build momentum with the right tools.

Change is challenging, but as we've seen in the last year, businesses *can* make decisions overnight, organizations *can* experiment with confidence, companies *can* undergo profound transformation without pronounced bureaucracy.

2020 showed us what we were capable of; 2021 will show us how far we can go. Already, financial leaders around the globe are sharing their cautious optimism about revenue increases and reaching pre-pandemic levels of business.

Tapping into this momentum takes a good, long look at the way you've always done things – plus a commitment to continuous improvement.

## SAP Concur solutions fit your goals, wherever you want to go.

As your business moves forward, your policies and processes may not be able to keep up. Put the right tools in place, and you can see your spending, manage your travel, and break down the barriers that hold your budgets back.

**Finance Leaders:** Put systems in place to protect the bottom line and keep compliance in control.

**Program Administrators:** Improve policies and workflows while strengthening cost controls and simplifying processes for every employee.

Explore the two following sets of tools for ways to make it happen.

### Foresight

Add preapprovals to your process, and you can see the future of everything from spending to safety.

#### Solution:

**Concur Travel & Expense**

#### Result:

Reshape travel and spend management into a smooth, digital workflow, making sure each part of the process is running at peak efficiency and delivering the results you need.

**Concur Request**

Add pre-spend approval to their processes, delivering proactive control over spending.

## Oversight

Use Artificial Intelligence (AI), machine learning, and SAP Concur experts to ensure every expense gets the right scrutiny, you get accurate analytics, and your business gets more control.

### Solution:

### Result:

#### Audit Services

Turn cumbersome audit processes over to audit experts, so finance teams – fueled by AI technology – can turn their attention to improving policies, processes, and the business's financial health.

#### Intelligence / Consultative Intelligence

Deliver visibility into spending and key metrics (including custom analytics compiled by reporting experts), offering insight into what's working and where to improve.

#### Concur Tax Assurance by VATBox

Use intelligent technology to improve VAT reclaim – capturing and enriching data and adapting to each market's rules – so you can efficiently meet requirements and bring more funds back into the business.

## You can only move forward if you know what you can spend.

You can't build momentum without financial flexibility, and for a business to be that agile, it requires visibility. SAP Concur solutions show you where you stand financially, so you can make more informed decisions faster.
